The public work session began at 6:30 A.M.

The purpose of the public work session was for review of the Caston School Corporation's Capital Project's budget and projected improvements to the building and grounds in the future. The board discussed potential projects and prioritized to determine what might be an immediate focus. As a result of the discussion, the board directed the Superintendent to pursue getting some specifications on the extent of work involved in potentially relocating two classroom areas to the current home economics area and potentially remodeling the area previously utilized as an industrial technology shop area for a weight room and fitness area. Other potential projects were also discussed and will be entertained as the budget allows.
